CUSTOMER CARE AND SERVICE

Always use original spare parts.

When contacting our Authorised Service Centre, ensure that you have the following data available: Model, PNC, Serial Number.

The information can be found on the rating plate.

 Warning / Caution-Safety information

 General information and tips

 Environmental information

Subject to change without notice.

1. SAFETY INFORMATION

Before beginning the installation and use of this appliance, carefully read the supplied instructions.

The manufacturer is not responsible for any injuries or damage that are the result of incorrect installation or usage. Always keep the instructions in a safe and accessible location for future reference.

Warning: Risk of fire / Flammable materials.

The appliance contains flammable gas, propane (R290), a gas with a high level of environmental compatibility.

Keep fire and ignition sources away from the appliance. Be careful not to cause damage to the refrigerant circuit containing propane.

1.1 Children and vulnerable people safety

WARNING!

Risk of suffocation, injury or permanent disability.

- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning the use of the appliance in a safe way and understand the hazards involved.
- Children between 3 and 8 years of age and persons with very extensive and complex disabilities shall be kept away from the appliance unless continuously supervised.
- Children of less than 3 years of age should be kept away from the appliance unless continuously supervised.
- Do not let children play with the appliance.
- Keep all packaging away from children and dispose of it appropriately.
- Keep detergents away from children.
- Keep children and pets away from the appliance when the door is open.
- If the appliance has a child safety device, it should be activated.
- Children shall not carry out cleaning and user maintenance of the appliance without supervision.

1.2 General Safety

- This appliance is for drying domestic-type, machine-dryable laundry only.
- Do not use the dryer function if laundry has been soiled with industrial chemicals.
- This appliance is designed for single household domestic use in an indoor environment.
- This appliance may be used in, offices, hotel guest rooms, bed & breakfast guest rooms, farm guest

houses and other similar accommodation where such use does not exceed (average) domestic usage levels.

- Do not change the specification of this appliance.
- If the tumble dryer is put on top of a washing machine, use the stacking kit. The stacking kit, available from your authorized vendor, can be used only with the appliance specified in the instructions supplied with the accessory. Read it carefully before installation (refer to the Installation leaflet).
- The appliance can be installed as freestanding or below a kitchen counter with correct space (refer to the Installation leaflet).
- Do not install the appliance behind a lockable door, a sliding door or a door with a hinge on the opposite side, that would prevent the appliance door from being fully open.
- The ventilation opening in the base must not be covered by a carpet, mat, or any floor covering.
- **WARNING:** The appliance must not be supplied through an external switching device, such as a timer, or connected to a circuit that is regularly switched on and off by a utility.
- Connect the mains plug to the mains socket only at the end of the installation process. Make sure that the mains plug is accessible after installation.
- Ensure good air ventilation in the room where the appliance is installed to avoid the backflow of unwanted gases into the room from appliances burning gas or other fuels, including open fires.
- **WARNING:** Do not install the appliance in an environment with no air exchange.
The appliance contains flammable gas, propane (R290), a gas with a high level of environmental compatibility. Keep fire and ignition sources away from the appliance. Be careful not to cause damage to the refrigerant circuit containing propane.

- **WARNING:** In the appliance enclosure or in the built-in structure, keep ventilation opening clear of obstruction.
- **WARNING:** Do not damage the refrigerant circuit.
- **WARNING:** Fill the water reservoir for steam treatment with distilled water only. Do not use tap water or any additives. It can cause damage to the appliance.
- If the mains power supply cable is damaged, it must be replaced by the manufacturer, its Authorised Service Centre or similarly qualified persons to avoid an electrical hazard.
- Do not exceed the maximum load of 9 kg (refer to the "Programme chart" chapter).
- Wipe away lint or packaging debris that has accumulated around the appliance.
- Do not run the appliance without a filter. Clean the lint filter before or after each use.
- Do not dry unwashed items in the tumble dryer.
- Items that have been soiled with substances such as cooking oil, acetone, alcohol, petrol, kerosene, spot removers, turpentine, waxes and wax removers should be washed in hot water with an extra amount of detergent before being dried in the tumble dryer.
- Items such as foam rubber (latex foam), shower caps, waterproof textiles, rubber backed articles and clothes or pillows fitted with foam rubber pads should not be dried in the tumble dryer.
- Fabric softeners, or similar products, should only be used as specified by the product manufacturer's instructions.
- Remove all objects from items that could be a source of fire ignition such as lighters or matches.
- **WARNING:** Never stop a tumble dryer before the end of the drying cycle unless all items are quickly removed and spread out so that the heat is dissipated.
- Before any maintenance operation, deactivate the appliance and disconnect the mains plug from the socket.

2. SAFETY INSTRUCTIONS

2.1 Installation

Warning: Risk of fire / Flammable materials.

- Remove all the packaging.
- Do not install or use a damaged appliance.
- Follow the installation instructions supplied with the appliance.
- Do not install the appliance in an environment with no air exchange. The appliance contains flammable gas, propane (R290), a gas with a high level of environmental compatibility. Keep fire and ignition sources away from the appliance. Be careful not to cause damage to the refrigerant circuit containing propane.
- Always take care when moving the appliance as it is heavy. Always use safety gloves and enclosed footwear.
- Do not install or use the appliance where the temperature can be lower than 5°C or higher than 35°C.
- The floor area on which the appliance is to be installed must be flat, stable, heat resistant and clean.
- Make sure that there is air circulation between the appliance and the floor.
- Always keep the appliance vertical when it is being moved.
- The rear surface of the appliance must be put against a wall.
- When the appliance is in its permanent position, check if it is levelled correctly with the aid of a spirit level. If it is not, adjust the feet accordingly.

2.2 Electrical connection

WARNING!
Risk of fire and electric shock.

- **WARNING:** This appliance is designed to be installed / connected to a grounding connection in the building.
- Make sure that the parameters on the rating plate are compatible with the

electrical ratings of the mains power supply.

- Always use a correctly installed shockproof socket.
- Do not use multi-plug adapters and extension cables.
- Do not pull the mains cable to disconnect the appliance. Always pull the mains plug.
- Do not touch the mains cable or the mains plug with wet hands.

2.3 Use

WARNING!
Risk of injury, electric shock, fire, burns or damage to the appliance.

Warning: Risk of fire / Flammable materials. The appliance contains flammable gas, propane (R290), a gas with a high level of environmental compatibility. Keep fire and ignition sources away from the appliance. Be careful not to cause damage to the refrigerant circuit containing propane.

- This appliance is for household (indoors) use only.
- Do not dry damaged (torn, frayed) items that contain padding or fillings.
- If laundry has been washed with a stain remover, carry out an additional rinse cycle before starting a drying cycle.
- Dry only fabrics that are suitable to dry in the appliance. Follow the cleaning instruction on the item label.
- Do not drink or prepare food with the condensed water/distilled water. It can cause health problems to people and pets.
- Do not sit or stand on the open door of the appliance.
- Do not dry dripping wet clothes in the appliance.

**WARNING!**

Fill the water reservoir for steam treatment with distilled water only. Do not use tap water or any additives. It can cause damage to the appliance.

- The condensed water from this appliance's condensed water container can also be used, if it is filtered first (e.g. with a coffee filter).
- Operate the steam programmes with distilled water only.
- Once the drying cycle or steam programme has been interrupted, the laundry and drum may be hot. Risk of burns! Take care when removing the laundry.
- Be careful when interrupting the steam programme: Do not open the machine door during the steam phase. Hot steam may result in burns. The display shows a message to indicate the steam phase.

2.4 Internal lighting

**WARNING!**

Risk of injury.

- Visible LED radiation, do not look directly into the beam.
- To replace the internal lighting, contact the Authorised Service Centre.

2.5 Care and cleaning

**WARNING!**

Risk of injury or damage to the appliance.

Warning: Risk of fire / Flammable materials. The appliance contains flammable gas, propane (R290), a gas with a high level of environmental compatibility. Keep fire and ignition sources away from the appliance. Be careful not to cause damage to the refrigerant circuit containing propane.

- Do not use water spray and steam to clean the appliance.

- Clean the appliance with a moist soft cloth. Use only neutral detergents. Do not use abrasive products, abrasive cleaning pads, solvents or metal objects.

2.6 Compressor

**WARNING!**

Risk of damage to the appliance.

- The compressor and its system in the tumble dryer is filled with a special agent which is free from fluoro-chloro-hydrocarbons. This system must stay tight. The damage of the system can cause a leakage.

2.7 Service

- To repair the appliance contact the Authorised Service Centre.
- Use original spare parts only.
- Concerning the lamp(s) inside this product and spare part lamps sold separately: These lamps are intended to withstand extreme physical conditions in household appliances, such as temperature, vibration, humidity, or are intended to signal information about the operational status of the appliance. They are not intended to be used in other applications and are not suitable for household room illumination.

2.8 Disposal

**WARNING!**

Risk of injury or suffocation.

Warning: Risk of fire / Risk of material damage and damage to the appliance.

- Disconnect the appliance from the mains electrical and water supplies.
- Cut off the mains electrical cable close to the appliance and dispose of it.
- The appliance contains flammable gas (R290). Contact your municipal authority for information on how to discard the appliance correctly.

- Remove the door catch to prevent children or pets from becoming trapped in the drum.
- Dispose of the appliance in accordance with local requirements

for the disposal of Waste Electrical and Electronic Equipment (WEEE).

3. PRODUCT DESCRIPTION

- 1** Water container
- 2** Control panel
- 3** Internal light
- 4** Appliance door
- 5** Filter
- 6** Rating plate
- 7** Airflow slots
- 8** Heat Exchanger lid
- 9** Heat Exchanger cover
- 10** Adjustable feet
- 11** Water re-circulation Filter

For ease of loading laundry or ease of installation the door is reversible (see the separate leaflet).

The rating plate reports:

- A. QR code
- B. model name
- C. product number
- D. electrical ratings
- E. serial number

4. CONTROL PANEL

- 1** Programme knob and ● RESET switch
- 2** Extra Anticrease touch button
- 3** Dryness Level touch button
- 4** Display
- 5** Time Dry touch button
- 6** Start/Pause touch button
- 7** Delay Start touch button
- 8** Steam Level touch button
- 9** End Alert touch button

- 10** Reverse Plus touch button
- 11** Extra Silent touch button
- 12** On/Off button

 Press the touch buttons with your finger in the area with the symbol or name of the option. Do not wear gloves when you operate the control panel. Make sure that the control panel is always clean and dry.

4.1 Display

Symbol on the display	Symbol description

	delay start selection (1h-20h)

5. WI-FI - CONNECTIVITY SETUP

This chapter describes how to connect the smart appliance to the Wi-Fi network and to link it to a mobile devices.

By this functionality you can receive notifications, monitor and control your tumble dryer from your mobile devices.

The Wi-Fi functionality is off as factory default setting.

To connect the appliance to enjoy the full range of features and services you need:

- Wireless network at home with internet connection enabled.

- Mobile device connected to wireless network.

Frequency	2.412 - 2.472 GHz for European market
Protocol	IEEE 802.11b/g/n
Max power	< 20dBm

5.1 QR code on rating plate

QR code can be used in two ways:

- Scan the QR code with the built-in camera app to download the My Electrolux Care application from the App store on your smart device and follow the required steps.
- Pairing your smart device with appliance to simplify the process. Scan the QR code with QR code scanner built-in My Electrolux Care application.

5.2 Installing My Electrolux Care

When connecting the tumble dryer to the application, stand near it with Your smart device.

Make sure that your smart device is connected to the wireless network.

1. Go to the App Store on your smart device or scan QR code (*see chapter "QR code on rating plate"*).
2. Download and install App My Electrolux Care.
3. Make sure you started a Wi-fi connection in the dryer. If not go to the section below.
4. Start the application. Select the country and language and login with Your email and password. If you do not have an account, create a new one following the instructions in My Electrolux Care.

5.3 Configuring the dryer wireless connection

Have My Electrolux Care downloaded and installed on your smart device.

1. In the App - tap on Add appliance and follow the instructions on the App for appliance connection.
2. Press the on/off button for a few seconds to activate the appliance.
3. Select a programme by turning the programme dial.
4. Press and hold down **Time Dry** and **Delay Start** buttons at the same time for 3 seconds until a 'click' sounds.

The text **On** pop up for about 5 seconds and the icon  starts flashing and wireless module begins starting up. It may takes about 10 seconds before it is ready. When the wireless module is ready, the text **AP (Access Point)** is on to inform you, that the access point will be open for about 3 minute.

5. Configure the My Electrolux Care app on your smart device.
6. If the connectivity is configured, **AP (Access Point)** symbol is off and the icon  will stop blinking and lit steadily to confirm that the configuration was successful.

-  Every time you switch the appliance on, the appliance takes 10 seconds to connect to the network automatically. When the indicator  stops blinking the connection is ready.

To switch the wireless connection off, press and hold **Time Dry** and **Delay Start** touch buttons for 3 seconds until the first acoustic signal: **OFF** appears on the display.

-  If you switch the appliance off and on again, the wireless connection is automatically off.

To remove the wireless credentials, press and hold **Time Dry** and **Delay Start**

touch buttons for **10** seconds until the second acoustic signal:  appears on the display.

5.4 Remote Start

My Electrolux Care allows you to control your laundry through a mobile device. It contains a large number of programmes, useful features and product information tailored perfectly to the appliance.

Through the app you can select the programmes already available from the appliance control panel, plus unlock additional programmes available only from a mobile device.

Additional programmes can change over the time along with new versions of the app.

It's personalized laundry care - all from your mobile device.

When the App is installed and the wireless connection is complete, you can start and stop a drying programme remotely by activate remote start.

The Remote Control activates automatically when you press the **Start/Pause** button to start the programme, but it is also possible to start a drying programme

Activate Remote Start

1. Press the **Delay Start** () button and the indicator  appears on the display.

2. Press the **Start/Pause** button to activate the Remote Start.

The indicators  appears on the display. Now it is possible to start the programme remotely.

Deactivate Remote Start

Press the **Delay Start** () touch button and confirm by pressing the **Start/Pause** button.

The  icon is off and the remote start is deactivated.

If the door is open, the **Remote Start** is deactivated.

The reset position ● deactivates the Remote Start.

5.5 Over-the-air update

WARNING!

During the update it is highly recommended to not turn off or unplug the appliance.

The App may propose an update for downloading new features.

The update is accepted via App only.

If a programme is running, the App notifies that the update will start at the end of the programme.

During the update, the appliance shows  in the display.

The appliance will usable again at the end of the update, without any notification about successful update.

If an error occurs, the appliance shows  in the display: just press any buttons or turn the knob to return to normal use.

6. PROGRAMMES

6.1 My Electrolux Care app and additional hidden programmes

My Electrolux Care app provides you with a **wide choice of additional hidden programmes**. Connect the appliance to My Electrolux Care and you will be able to choose the programme that suits your needs most.

Programme names are subject to change depending on market requirements without notice. The App will give you a complete description of each programme.

Denim Duvet Sport Silk	Microfibre Towels Fleece Working Clothes	Proofing Treatment Business Shirts Drying Rack
---------------------------------	---	--

6.2 Programme table

Programme	Load 1)	Properties / Fabric type ²⁾
 ³⁾ Cottons Eco	9 kg	Cotton fabrics programme designed for maximum energy saving. / 
Cottons	9 kg	White and coloured cotton fabrics programme. Default setting is for ready to store dryness level. / 
Synthetics	4 kg	Blended garments containing mostly synthetic fibres like polyester, polyamide, etc. / 
Delicates	2 kg	Recommended for generic delicate fabrics such as viscose, rayon, acrylic and their blends. / 
Wool  	1 kg	Gently dries for machine and hand-washable woollens. Remove immediately the items when the programme is completed.
Down Jacket 	2 kg	An automatic programme that precisely dries even the internal insulation of jackets with feather, down, or synthetic filling. Maintains garment appearance and thermal functionality / 
Sport	2 kg	Dries generic sportswear made with synthetic fibres including polyester, elastane blends, and polyamide. / 

Programme	Load ¹⁾	Properties / Fabric type ²⁾
Outdoor 	2 kg	Maintains the functionality of outdoor fabrics made of technical textile and restores water repellency on waterproof jackets and shell jackets with removable linings (suitable for drying in tumble dryer). / 
Bedlinen XL	4,5 kg	Dries up to three bed linen sets at once. Minimises twists and tangles of large items to ensure every bed linen reaches a uniform dryness without wet spots. / 
 Hygiene	5 kg	Dries and sanitizes your garments and other items maintaining the temperature above 60°C over time, removing 99.9% of bacteria and viruses ⁴⁾ . Note: This cycle should only be used for wet items. Not suitable for delicate items. / 
MixCare	6 kg	Mix of garments made of cotton, cotton-synthetic blend and synthetic fabric. / 

¹⁾ The maximum weight refers to dry items.

²⁾ For fabric mark meaning see chapter *HINTS AND TIPS: Preparing the laundry*.

³⁾ The  Cottons Cupboard Dry ECO programme is the "Standard cotton programme" according to Commission Regulation EU No. 392/2012. It is suitable for drying normal wet cotton laundry and it is the most efficient programme in terms of energy consumption for drying wet cotton laundry.

⁴⁾ Tested for *Candida albicans*, MS2 Bacteriophage and *Escherichia coli* in external test performed by Swissatest Testmaterialien AG in 2021 (Test Report No. 20212038).

Woolmark Apparel Care - Blue

  <p>WOOL HAND WASH SAFE</p>	<p>The wool drying cycle of this machine has been approved by The Woolmark Company for the drying of wool garments labelled as "hand wash" provided that the garments are dried according to the instructions issued by the manufacturer of this machine. Follow the garment care label for other laundry instructions. M2140</p> <p>The Woolmark symbol is a Certification mark in many countries.</p>
---	---

Steam programmes

Programme	Load 1)	Properties
Cottons	2 kg	Helps to remove the creases from the cottons pieces of clothing. Programme duration is automatically adjusted to dry the load up to the optimal humidity level for steam action. Frequently it is not necessary to iron the clothes after steam programme. In this case clothes must be hang on the clothes hanger or folded.
Synthetics	2kg	Helps to remove the creases from the synthetics pieces of clothing. Programme duration is automatically adjusted to dry the load up to the optimal humidity level for steam action. Frequently it is not necessary to iron the clothes after steam programme. In this case clothes must be hang on the clothes hanger or folded.
Refresh	2 kg	For dry clothes only. Also applicable to remove odours. The clothes become soft and cosy. We recommend to remove and hang the clothes immediately after the programme end.

1) The maximum weight refers to dry items.

7. OPTIONS

7.1 Dryness Level

This function helps to increase dryness of the laundry. There are 3 options:

-  Extra Dry
-  Cupboard Dry
-  Iron Dry

7.2 Extra Anticrease

Extends the anti-crease phase by 30,60, 90 or 2 hours at the end of the drying cycle. This function reduces creases. The laundry can be removed during the anti-crease phase.

7.3 Extra Silent

The appliance operates with low noise without effect on the drying quality. The appliance operates slowly with longer cycle time.

7.4 Reverse Plus

Increase drum reversing frequency to reduce items twisting and entanglement. To increase uniformity of drying result and help reduce creases. Recommended for large or long items (e.g. sheets, trousers, long dresses)"

7.5 End Alert

The buzzer sounds at the:

- cycle end
- start and end of the anti-crease phase
- cycle interruption

The buzzer function is by default always on. You can use this function to activate or deactivate the sound.

You can activate the End Alert option with all programmes.

7.6 Time Dry

You can set the programme duration, from a minimum of 10 minutes to a

maximum of 2 hours. The required duration is related to the quantity of laundry in the appliance.

We recommend that you set a short duration for small quantities of laundry or for only one item.

TIME DRYING RECOMMENDATION	
up 10 min	action of cool air only (no heater).
10 - 40 min	additional drying to improve dryness after previous drying cycle.

TIME DRYING RECOMMENDATION

>40 min

full drying of the small laundry loads up to 4 kg, well spun (>1200 rpm).

7.7 Time Dry on Wool programme

Option suitable for Wool programme to adjust final dryness level.

7.8 Options table

Programmes ¹⁾	Dryness Level			Extra Anti-crease	Extra Silent	Reverse Plus	Steam Level	Time Dry
Cottons Eco		■		■				
Cottons	■	■	■	■	■	■	■	■
Synthetics	■	■	■	■	■	■	■	■
Refresh				■			■	
Delicates		■		■				
Wool								■ 2)
Down Jacket	■	■

Outdoor		■						
Bedlinen XL	■	■	■	■		■		
Hygiene	■			■				

Programmes ¹⁾	Dryness Level		Extra Anti-creases	Extra Silent	Reverse Plus	Steam Level	Time Dry
MixCare	■	■	■		■		■

1) Together with the programme you can set 1 or more options. To activate or deactivate them, press the related touch button.

2) See chapter OPTIONS: Time Drying on Wool programme

8. STEAM FUNCTION

Steam helps to remove odours like the outdoor air.

Decreases or removes creases. Makes the pieces of clothing more flexible.

The pieces of clothing after steam programme are easy to iron.

At the end of the steam cycles clothes come out with a residual humidity appropriate for ironing.

If clothes are not ironed immediately hang them until they are completely dry.

At the start, because of wide types of fabrics, apply small steam level. You easily get the experience, which helps you to use the sufficient steam level.

8.1 How to fill water container for steam system

CAUTION!

Use only distilled or demineralized water. Always when the container is empty the indicator  is on and you cannot start the steam programmes.

Water container for steam system is automatically refilled if you dry with standard and steam programmes. If the water tank is empty you can fill it manually. The condensed water is also applicable for steam system. The condensate water must be filtered e.g. with a coffee filter to remove small pieces of fluff.

To fill water container:

1. Turn on the appliance.
2. Set 1 of the programmes with steam option to check the water level.
3. Pull the water container. Keep it in horizontal position.

4. Fill the water until it reaches the "max" level.

8.2 Steam Level

This option is to set the required steam level. It depends on the: type, weight and volume of the laundry.

There are 3 possible selections:

- _ minimum level
- __ moderate level
- ___ maximum level

5. Put the water container.

The icon  alerts you when the steam tank is empty. In this case steam functions can not be activated.

8.3 Steam Level chart

Programmes / types of the clothes	Steam Level	Load ¹⁾
Cottons	_ minimum level	0,5 - 1 kg
	__ moderate level	1 - 1,5 kg
	___ maximum level	1,5 - 2kg
Cottons / shirts	_ minimum level	1 - 2 items
	__ moderate level	3 - 4 items
	___ maximum level	5 items
Synthetics	_ minimum level	0,5 - 1 kg
	__ moderate level	1 - 1,5 kg
	___ maximum level	1,5 - 2kg
Synthetics / shirts	_ minimum level	1 - 2 items
	__ moderate level	3 - 4 items
	___ maximum level	5 items
Refresh	_ minimum level	0,5 kg
	__ moderate level	1 kg
	___ maximum level	2 kg

¹⁾ The maximum weight refers to dry items.

9. SETTINGS

- A. Time Dry touch button
- B. Start/Pause touch button
- C. Delay Start touch button
- D. Steam Level touch button
- E. End Alert touch button
- F. Reverse Plus touch button
- G. Extra Silent touch button
- H. Extra Anticrease touch button
- I. Dryness Level touch button

9.1 Child lock function

This option prevents children playing with the appliance while a programme is operating. The touch buttons are locked.

Only the on/off button is unlocked.

Activating the child lock option:

1. Press the on/off button to activate the appliance.
2. Press and hold touch button (D) for a few seconds.

The child lock indicator comes on.

- i** It is possible to deactivate the child lock option while a programme operates. Press and hold the same touch buttons until the child lock indicator goes off. The Child Lock function isn't available for 8 s after switching on the appliance.

9.2 Adjustment of the remaining moisture

- i** Every time you enter in the "Adjustment of remaining laundry moisture" mode, previously set degree of remaining moisture will change into next value (e.g previously set - 2 - will change into - 1 -).

To change the default degree of remaining moisture:

1. Press the on/off button to activate the appliance.
2. Use the programme knob to set any programme.
3. Wait approximately 8 seconds.
4. Press and hold buttons (G) and (F) at the same time.

One of these indicators comes on:

- - 0 - maximum dryness
 - - 1 - more dry laundry
 - - 2 - standard dry laundry
5. Press and hold buttons (G) and (F) again until the indicator of the correct level comes on.

- i** If the display returns to the normal mode (the time of the selected programme from step 2. will be displayed), while setting the degree of remaining moisture, press and hold buttons (G) and (F) once again to enter to the "Adjustment of remaining laundry moisture" mode (previously set degree of remaining moisture will change into next value).

6. To accept the selected degree of remaining moisture, wait 5 s and the display returns to the normal mode.

Dryness level	Display symbol
---------------	----------------

- 0 -	maximum dryness	+ 
- 1 -	more dry laundry	+ 
- 2 -	standard dry laundry	

9.3 Water container indicator

By default, the water container indicator is on. It comes on when the programme is completed or when it is necessary to empty the water container.

-  If a draining kit is installed (additional accessory), the appliance automatically drains the water from the water container. In this case we recommend that you deactivate the indicator of the water container.

Deactivating the water container indicator:

1. Press the on/off button to activate the appliance.
2. Wait approximately 8 seconds.
3. Press and hold touch buttons (H) and (I) at the same time.

The display shows one of these 2 configurations:

- The display shows "Off". After 5 s the display returns to normal mode.
- The display shows "On". After 5 s the display returns to normal mode.

10. BEFORE FIRST USE

-  Rear drum locks are removed automatically when dryer is activated for the first time. Possible to hear some noise.

To unlock the rear drum locks:

1. Switch on the appliance.
 2. Set any programme.
 3. Press the Start/Pause button.
- Drum starts to rotate. Rear drum locks are automatically deactivated.

Before you use the appliance to dry items:

- Clean the tumble dryer drum with a moist cloth.
- Start a 1 hour programme with moist laundry.
- Fill up the steam water container before using a steam programme for the first time (see chapter on "*Steam function - How to fill water container for steam system*").

-  At the beginning of the drying cycle (first 3-5 min) there could be a slightly higher sound level. This is due to the compressor starting up. This is normal for compressor powered appliances such as refrigerators and freezers.

10.1 Unusual smell

The appliance is tightly packed.

After product unpacking you can feel an unusual smell. This is normal for brand new products.

Appliance is built of several different types of material which all together can generate unusual smell.

Over usage time, after few drying cycles unusual smell gradually disappears.

10.2 Noises

i Different noises may be heard at different times during the drying cycle. They are perfectly normal operating sounds.

Working compressor.

Rotating drum.

Working fans.

Working pump and transferring condensation to the tank.

11. DAILY USE

11.1 Start a programme without delay start

1. Prepare the laundry and load the appliance.

CAUTION!

Make sure that when you close the door, the laundry does not get caught between the appliance door and the rubber seal.

2. Press the on/off button to activate the appliance.
3. Set the correct programme and options for the type of load.

The display shows the programme duration.

Real drying time will depend on type of the load (quantity and composition), the room temperature and the humidity of your laundry after spin drying phase.

4. Press the Start/Pause touch button.

The programme starts.

11.2 Starting the programme with delay start

1. Set the correct programme and options for the type of load.
2. Press the delay start button again and again until the display shows the delay time you want to set.

 You can delay the start of a programme from a minimum of 1 hour to a maximum of 20 hours.

3. Press the Start/Pause touch button. **The display shows the countdown of the delay start.**

When the countdown is completed, the programme starts.

11.3 Change a programme

1. Press the on/off button to deactivate appliance
2. Press the on/off button to activate the appliance.
3. Set the programme.

Alternatively:

1. Rotate the selector knob to the ● "Reset" position.
2. Wait for 1 second. The display shows — — —.
3. Set the programme.

11.4 At the end of the programme

When the programme is completed:

- An intermittent acoustic signal operates.
- The display shows  : 
- The indicator  is on.
- The indicators  Filter and  Tank may come on.
- The Start/Pause indicator is on.

The appliance continues to operate with the anti-crease phase for approximately 30 minutes or more if Extra Antcrease option was set (see chapter *Option - Extra Antcrease*).

The anti-crease phase reduces creasing.

You can remove the laundry before the anti-crease phase is completed. We recommend, for better results, that you remove the laundry when the phase is almost completed.

When the anti-crease phase is completed:

- The display still shows  : 
- The indicator  is off.
- The indicators  Filter and  Tank remain on.
- Start/Pause indicator goes off.

1. Press the on/off button to deactivate the appliance.
2. Open the appliance door.
3. Remove the laundry.

 To keep the effects of the Steam treatment, clothes must be removed one garment at a time during the antcrease phase and hung immediately on a clothes hanger to dry (for minimum 5-15 min, depending on fabric and selected steam level). Do up the buttons and tug the garment into shape, paying particular attention to cuffs and seams.

4. Close the appliance door. Possible causes of unsatisfactory drying results:

- Inadequate default dryness level settings. See chapter *Adjustment of default dryness level*
- Room temperature is too low or too high. Optimal room temperature is between 18°-25°C.

 **Always clean the filter and empty the water container when a programme is completed.**

11.5 Stand-by function

To reduce energy consumption, this function automatically deactivates the appliance:

- After 5 minutes if you do not start the programme.
- After 5 minutes from the end of the programme.

The time is reduced to 30 seconds if the selector knob is pointing to ● "Reset" position.

12. HINTS AND TIPS

12.1 Preparing the laundry

Very often the clothes after washing cycle are kneaded and tangled altogether. Drying kneaded and tangled clothes is inefficient. To assure proper air flow and even drying it is recommended to shake and load one by one the clothes to the tumble dryer.

To assure proper drying process:

- Close the zips.
 - Close the fasteners of duvet covers.
 - Do not dry ties or ribbons loose (e.g. apron ribbons). Tie them before you start a programme.
 - Remove all items from pockets.
 - Turn items with the internal layer made of cotton inside out. Cotton layer must be faced outwards.
 - Always set the programme suitable for the type of laundry.
 - Do not put light and dark colours together.
 - Use suitable programme for cottons, jersey and knitwear to reduce shrinkage.
 - Do not exceed the maximum load stated in the programmes chapter or shown on the display.
 - Dry only the laundry that is suitable for tumble drying. Refer to the fabric label on the items.
- Do not dry large and small items together. Small items can be trapped inside the large items and remain wet.
 - Shake the large clothes, fabrics before placing in the tumble dryer. It is to avoid moist places inside the fabric after the drying cycle.

Steam function hints

- Do not use steam programmes for: wool not suitable to dry in the tumble dryers, leather, textiles with large metal, wooden or plastic parts, textiles with rusting metal parts, oilskins or wax cotton garments.
- Sort and dry together textiles with similar size, weight, material and colour.
- Do not dry new, coloured textiles together with light-coloured laundry items. Colours may fade (check colour fastness of fabric when damp in an inconspicuous area).
- Do not use dry cleaning sets in combination with the steam programmes.
- Remove stains by washing or using localised stain removal before the steam programme use.
- For best drying results turn items with double-layered fabrics inside out (e.g. with cotton lined anoraks, the cotton layer should be outermost).

Fabric label	Description
	Laundry is suitable for tumble drying.
	Laundry is suitable for tumble drying at higher temperatures.
	Laundry is suitable for tumble drying at low temperatures only.
	Laundry is not suitable for tumble drying.

13. CARE AND CLEANING

13.1 Cleaning the filter

CAUTION!

Avoid the use of water to clean the filter. Instead throw away lint in the dustbin (avoid dispersion of plastic fiber in water ambient).

To achieve the best drying performances clean the filter regularly , clogged filter lead to longer cycles and energy consumption increase. Use your hand to clean the filter , and if necessary , a vacuum cleaner .

1.

2.

3.

4.

5. 1)

6.

1) If necessary remove fluff from the filter socket and gasket. You can use a vacuum cleaner.

13.2 Emptying the water container

1.

2.

3.

4.

You can use the water from the water container as an alternative to distilled water (e.g. for steam ironing). Before you use the water, remove dirt residues with a filter.

13.3 Cleaning the Heat Exchanger

1.

2.

3.

4.

5.

6.

7.

8.

9.

**CAUTION!**

Do not touch the metal surface with bare hands. Risk of injury. Wear protective gloves. Clean carefully to avoid damaging the metal surface.

13.4 Cleaning the steam system filter

**CAUTION!**

Do not use the steam programmes without the steam system filter or with damaged or blocked filter.

If the symbol  (*clean the steam system filter*) is on the display you must clean the filter.

To clean the steam system filter:

1. Pull the water container. Keep it in horizontal position.

2. Pull the filter.

3. Open the filter.

4. Use a moist hand to clean the filter.

5. Put the filter inside the filter socket.
6. Put the water container.

13.5 How to drain the water from the steam system container

i The quality of the water in the container can get worse. If you will not use the appliance for long period drain the water from the container.

To drain the water:

1. Open the door.
2. Open the condenser cover.

3. Turn the lever to unlock the condenser lid and lower the condenser lid.

4. Take the pipe placed on the left wall of the compartment. Open the cap to drain the water.

5. Close the cap.
6. Place the pipe back on its seat.
7. Close the condenser lid.
8. Turn the lever to lock the condenser lid.
9. Close the condenser cover.

13.6 Cleaning the drum

! **WARNING!**
Disconnect the appliance before you clean it.

Use a standard neutral soap detergent to clean the inner surface of the drum and drum lifters. Dry the cleaned surfaces with a soft cloth.

! **CAUTION!**
Do not use abrasive materials or steel wool to clean the drum.

13.7 Cleaning the control panel and housing

Use a standard neutral soap detergent to clean the control panel and housing.

Use a moist cloth to clean. Dry the cleaned surfaces with a soft cloth.

! **CAUTION!**
Do not use furniture cleaning agents or cleaning agents which can cause corrosion.

13.8 Cleaning the airflow slots

Use a vacuum cleaner to remove fluff from the airflow slots.

14. TROUBLESHOOTING

WARNING!
Refer to Safety chapters.

14.1 Error Codes

The appliance does not start or it stops during operation.

First try to find a solution to the problem (refer to the table). If the problem persists, contact the Authorised Service Centre.

WARNING!
Deactivate the appliance before carrying out any check.

In case of major problems, the acoustic signals operate, the display shows an error code and the Start/Pause button may flash continuously:

Error code	Possible cause	Remedy
E50	Appliance motor overloaded. Too much laundry or entrap in the drum.	The programme was not completed. Remove the laundry from the drum, set the programme and restart the cycle.
E90 or E91	Internal fail. No communication between electronic elements of the appliance.	The programme was not finished properly or the appliance stopped too early. Switch the appliance off and on again. If the error code appears again, contact the Authorised Service Centre.
EH0	The mains supply is unstable.	When the appliance is showing EH0 , please wait until main supply is stable than press start. If the appliance pause the cycle without any indication then press the cycle start. If the warning will occur check the power cord / socket integrity or main supply.

If the display shows other error codes, deactivate and activate the appliance. If the problem continues, contact the Authorised Service Centre.

In case of different problem with the tumble dryer check the table below for possible solutions.

14.2 Troubleshooting

Problem	Possible solution
You cannot activate the appliance.	Make sure that the mains plug is connected to the mains socket.

Problem	Possible solution
	Check fuse in fuse box (domestic installation).
The programme does not start.	Press Start/Pause.
	Make sure that the appliance door is closed.
Steam programme does not start. The steam water container indicator lights up.	Fill water container.
	Clean the steam water filter
After a steam programme, clothes are not sufficiently smooth.	Note the composition of the fabric.
	Set a higher steam level.
	Load the machine with fewer clothes, or only equivalent ones.
	Remove clothes quickly one at a time from the machine as soon as possible after the start of the anticrease phase.
	Hang clothes on clothes hangers, do up buttons and tug clothes into shape.
	Reshape multilayered clothes by ironing after they come out of the machine.
After a steam programme, there are wet spots on clothes.	Incorrect steam level selection. Set suitable steam level (see steam guide for reference).
	Clean the filter (see chapter <i>CARE AND CLEANING</i>) before performing the steam cycle.
Even after several drying cycle the steam water tank is empty.	Clean the steam water filter.
The appliance door does not close.	Make sure that the installation of the filter is correct.
	Make sure that the laundry is not caught between the appliance door and the rubber seal.
The appliance stops during operation.	Make sure that the water container is empty. Press Start/Pause to start the programme again.
	Load is too small, increase the load or use the Time Drying programme.

Problem	Possible solution
The cycle time is too long or unsatisfactory drying result. ¹⁾	Make sure that the weight of the laundry is suitable for the duration of the programme.
	Make sure that the filter is clean.
	The laundry is too wet. Spin the laundry in the washing machine again.
	Ensure that the room temperature is higher than +5°C and lower than +35°C. Optimal room temperature is 18°C to 25°C.
The App cannot connect to the dryer.	Set the Time Drying or the Extra Dry programme. ²⁾
	Check if your smart device is connected to the wireless network. Check your home network and router. Restart the router. Contact your wireless service provider if there are problems with the wireless network.
The App frequently cannot connect to the dryer.	The dryer, the smart device, or both, need to be configured again.
	Try to move the home router as near the dryer as possible or consider purchasing a wireless range extender.
	Turn the microwave off. Avoid using the microwave and the Remote Control of the dryer at the same time. The microwaves disrupt the Wi-Fi signal.
The display shows — — —.	If you want to set a new programme, deactivate and activate the appliance.
	Make sure that the options are suitable for the programme.

¹⁾ After maximum 5 hours, the programme ends automatically.

²⁾ It can happen that some area remains humid when drying big items (e.g. bed sheets).

If the drying results are not satisfactory

- The set programme was incorrect.
- The filter is clogged.
- The Heat Exchanger is clogged.
- There was too much laundry in the appliance.
- The drum is dirty.
- Incorrect setting of the conductivity sensor (See chapter "*Settings - Adjustment of the remaining laundry moisture degree*" for better setting).
- The airflow slots are clogged.
- Room temperature is too low or too high (optimal room temperature 18°C to 25°C)

15. TECHNICAL DATA

Height x Width x Depth	850 x 596 x 638 mm (maximal 662 mm)
Max. depth with the appliance door open	1107 mm
Max. width with the appliance door open	958 mm
Adjustable height	850 mm (+ 15 mm - feet regulation)
Drum volume	118 l
Maximum load volume	9 kg
Voltage	230 V
Frequency	50 Hz
Sound power level	63 dB
Total power	1600 W
Energy efficiency class	A+++
Energy consumption on the standard cotton programme with the full load. ¹⁾	1,68 kWh
Energy consumption on the standard cotton programme with the partial load. ²⁾	0,86 kWh
Annual energy consumption ³⁾	194,1 kWh
Left-on mode power absorption ⁴⁾	0,05 W
Off mode power absorption ⁴⁾	0,05 W
Power consumption in networked standby ⁵⁾⁴⁾	2,00 W
Time to networked standby ⁴⁾	15 min.
Type of use	Household
Allowed ambient temperature	+ 5°C to + 35°C
Level of protection against ingress of solid particles and moisture ensured by the protective cover, except where the low voltage equipment has no protection against moisture	IPX4
Gas designation	R290

Weight	0,149 kg
--------	----------

- 1) With reference to EN 61121. 9 kg of cotton centrifuged at 1000 rpm.
- 2) With reference to EN 61121. 4,5 kg of cotton centrifuged at 1000 rpm.
- 3) Energy consumption per year in kWh, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used (REGULATION (EU) No. 392/2012).
- 4) With reference to EN 61121.
- 5) The energy consumption of the connected function is approximately 17,5 kWh per year. To disconnect this function, please refer to the chapter "Wi-fi - Connectivity setup".

The information given in the chart above is compliant with the EU Commission regulation 392/2012 implementing directive 2009/125/EC.

15.1 Consumption data

Stated values are obtained in laboratory conditions with relevant standards. Different parameters can change the data, for example: the quantity of laundry, the type of laundry and the ambient conditions. The initial moisture content of the laundry, the water type, the supply voltage and if you change the default setting of a programme may also affect the energy use and the duration of the drying programme.

Programme	Spun at / residual humidity	Drying time ¹⁾	Energy consumption ²⁾
Cottons Eco 9 kg			
Cupboard Dry	1400 rpm / 50%	163 min.	1,46 kWh
	1000 rpm / 60%	199 min.	1,68 kWh
Cottons 9 kg			
Iron Dry	1400 rpm / 50%	113 min.	0,96 kWh
	1000 rpm / 60%	136 min.	1,19 kWh
Cottons Eco 4,5 kg			
Cupboard Dry	1400 rpm / 50%	87 min.	0,72 kWh
	1000 rpm / 60%	110 min.	0,86 kWh
Synthetics 4 kg			
Cupboard Dry	1200 rpm / 40%	68 min.	0,53 kWh
	800 rpm / 50%	76 min.	0,62 kWh

1) For partial loads, the cycle time is shorter and appliance uses less energy.

2) Improper ambient temperature and/or poorly centrifuged laundry can prolong cycle time and increase the energy consumption.

16. PRODUCT INFORMATION SHEET IN REFERENCE TO E.U. REGULATION 1369/2017

Product Information Sheet	
Trade Mark	Electrolux
Model	EW9H869S1 PNC916099451
Rated capacity in kg	9
Air vented or condenser tumble dryer	Condenser
Energy efficiency class	A+++
Energy consumption in kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used.	194,1
Automatic tumble drier or non-automatic tumble drier	Automatic
Energy consumption of the standard cotton programme at full load in kWh	1,68
Energy consumption of the standard cotton programme at partial load in kWh	0,86
Power consumption of the off-mode in W	0,05
Power consumption in left-on mode in W	0,05
Duration of the left on mode in minutes	10
The 'standard cotton programme' used at full and partial load is the standard drying programme to which the information in the label and the fiche relates, this programme is suitable for drying normal wet cotton laundry and it is the most efficient programme in terms of energy consumption for cotton.	
Weighted programme time of the 'standard cotton programme at full and partial load' in minutes	148
Programme time of the 'standard cotton programme at full load' in minutes	199
Programme time of the 'standard cotton programme at partial load' in minutes	110
Condensation efficiency class on a scale from G (least efficient) to A (most efficient)	A
Average condensation efficiency of the standard cotton programme at full load as a percentage	91
Average condensation efficiency of the standard cotton programme at partial load as a percentage	91

Weighted condensation efficiency for the 'standard cotton programme at full and partial load'	91
Sound power level in dB	63
Built in appliance Y/N	No

The information given in the chart above is compliant with the EU Commission regulation 392/2012 implementing directive 2009/125/EC.

17. ENVIRONMENTAL CONCERNS

Recycle materials with the symbol . Put the packaging in relevant containers to recycle it. Help protect the environment and human health by recycling waste of electrical and electronic appliances. Do not dispose of

appliances marked with the symbol  with the household waste. Return the product to your local recycling facility or contact your municipal office.
