

The fast, safe and clean way to cook

Induction technology ingeniously targets the spot you're heating, leaving other areas cool and safe. The hob responds instantly to temperature changes making your cooking more efficient, and the glass surface means cleaning is easy.

Product Benefits & Features
The right cooker for you – easy, fast and safe

Induction Hob technology means that heat is delivered quickly and precisely, while the surrounding areas remain cool and safe. It also reacts instantly to temperature changes. And the smooth surface makes it easy to clean.

Multilevel Cooking. Cook more at the same time

With Multilevel Cooking, the additional heating ring ensures your dishes are perfectly cooked even when loaded with two trays at the same time.

Direct touch control for every zone

Easily adjust your hob's temperature settings with our direct touch controls. Each cooking zone has an individual power control, so it's clear to see and simple to change the heat settings. And as it's one smooth surface, it's easy to clean.

Hob2Hood does the work while you cook

Hob2Hood is the wireless connection between your hob and hood, automatically adjusting the extraction fan based on your cooking temperature. Instantly responsive, this feature ensures you always have extra help in the kitchen.

XXL Capacity gives you more from your oven

XXL Capacity in your cooker cavity lets you maximise cooking. Greater efficiency means you can get more from your dishes and rely on your recipes to feed more people when you need to.

- Cooker with electric oven and hob
