
Designed for every wine you love

With a thoughtful, refined design, the 800 Perfect Shelving displays your collection beautifully, while creating a natural cellar environment that protects and preserves all your wines, making them always ready to serve.

Product Benefits & Features

Perfect Shelving for your wine collection

Store and display your wines beautifully with Perfect Shelving. Premium wood-slat shelving with smooth runners offers ideal spacing for every 750ml bottle – so all your wines are easy to reach and enjoy.

Two distinct temperature zones for perfect preservation

With Dual Zone, every wine is stored at its finest. Two distinct temperature zones – an adjustable zone from 5°C to 12°C and one zone up to 18°C – create the ideal serving conditions for whites, rosés, sparkling wines and reds.

Perfect Illumination to create a refined display for your wines

Elevate your wine collection with a refined display of your favourite bottles. Perfect Illumination with adjustable LED lighting in warm, neutral or cool tones enhances visibility and highlights every bottle. Tinted glass filters UV rays.

Quiet wine cellar protects your favourite wines

The low-vibration environment keeps your wines as still as in a traditional wine cellar, protecting flavour and character as they mature. With silent operation, the cellar blends seamlessly into a peaceful home environment.

Seamless integration for every kitchen design

Designed for total freedom. The built-in wine cabinet integrates seamlessly next to Electrolux oven or any other appliance, for a beautiful, streamlined finish.*

- Touch control
- Telescopic guides for easy entry and overview of your bottles
- Audible & visual open door warning signal
- Door hinges placement: Right & Reversible, Soft closing

*Model EWCD280B6B tested per internal procedures in vertical and side-by-side setups, including pyrolytic cleaning. Optimal performance requires installation per official guidelines by a qualified professional.
