SkinSpa ThermLED

Reduce Fine Lines
Smooth Texture
Enhance Glow

SkinSpa ThermLED pairs four science-backed LED wavelengths with heated massage for visibly smoother, clearer, more even-looking skin. Just choose your attachment, snap it on and begin your routine. Pair your sessions with Skin Coach in the Therabody app to get intelligent, personalized and adaptable routines — and add on the CryoCurrent™ attachment (sold separately) for a visibly lifted, firmer and more contoured appearance.

4-in-1 LED

When you want clinically validated doses of LED light, choose the 4-in-1 LED attachment to target a variety of skin concerns.

Science-backed benefits[1]

- **Red light** to support collagen production and help visibly smooth fine lines and wrinkles
- **Red + infrared light** to target deeper layers of the skin, to reduce the appearance of dark spots
- **Blue light** to reduce the appearance of blemishes
- **Yellow light** helps to calm visible redness and promote more even-looking skin tone

Key features

- Proximity sensor to guide device placement for optimal light dosage & distance from the skin
- Right light: 633nm, Red + IR: 633nm / 833nm, Yellow: 590nm, Blue: 415 nm
- Science-backed light doses in only 3 minutes

Heat & vibration

When you want to prep your skin and enhance radiance, choose the heat & vibration attachment for heated massage.

Science-backed benefits[1]

- Enhances radiance
- Boosts circulation
- Preps skin for better skincare absorption

Key features

- Contoured tip to help reach all areas of the face
- Heat levels: Low: 95°F (35°C), Medium: 100°F (38°C), High: 108°F (42°C)
- 4 vibration settings

Red, Red + Infrared, Blue & Yellow LED Light Therapy
