

BEAUTY

SkinSpa CryoCurrent

Tighten & Tone
Lift & Contour
Reduce Fine Lines
Decrease Puffiness

SkinSpa CryoCurrent™ is the first-ever device to pair microcurrent with cold therapy, powered by proprietary, clinically-proven technology — for visibly lifted, firmed, contoured and depuffed skin from home.

Pair your sessions with Skin Coach in the Therabody app to get intelligent, personalized and adaptable routines. For targeted LED therapy and extra radiance, add on 4-in-1 LED and heat & massage attachments (sold separately) for the complete SkinSpa System.

Clinically-proven benefits

- Clinically-proven to visibly lift, firm & contour the face after just 1 use[1]
- Clinically-proven to improve firmness, elasticity and visibly reduce fine lines after 8 weeks of daily use[2]
- Microcurrent delivers low-level electrical stimulation to support a visibly lifted, firmer and more contoured appearance
- Cold therapy simultaneously sculpts and depuffs

Key features

Uniquely shaped to target all areas of the face and neck

3 cold settings: Level 1: 54°F (12°C), Level 2: 50°F (10°C), Level 3: 46°F (8°C)

5 microcurrent settings: 100-500 microamps (uA)

Microcurrent Therapy

Cold Therapy

Personalized App Routines

[1]Results from a clinical study with 112 subjects following a single 15-minute treatment protocol administered by a licensed aesthetician. Individual results may vary. Learn more at therabody.com/science.

[2]8-week clinical study with 110 subjects following 1x/day use of 8-minute treatment protocol. Learn more at therabody.com/science.
