Ring subscription plan

Subscribe to an eligible Ring subscription plan to get so much more from your Ring devices. Review, save and share videos captured by your Ring device, get smart alerts with the help of Ring IQ, access secure cloud storage and more. (An eligible Ring subscription plan is required to access certain features.)

Up to 180 Days of Event History: Record your motion events and scroll back through up to 180 days of your timeline to review the moments you missed.

Smart Alerts: Cut through notification clutter with alerts that identify key things like People, Packages and Vehicles.

Familiar Faces: Easily tag your family and friends in the Ring app so your device can notify you when someone is spotted.

Learn about subscription benefits on Ring.com.

[Disclaimer notes]

Key Characteristics

Dimensions	70mm X 70mm X 137mm including stand
Field of View	140° Horizontal, 85° Vertical
Video	2K video resolution, Night Vision, up to 6x Enhanced Zoom
Power	12.5 W Indoor/Outdoor Power Adapter (USB-C)
Connectivity	Wifi 4, Single-band wifi connection @ 2.4GHz
Operating conditions	-20°C to 50°C, Weather Resistant. Camera may temporarily turn off when exposed to direct sunlight in extreme heat conditions.
Warranty	One-year limited warranty, and including theft protection. If you are a consumer, the limited warranty is in addition to your consumer rights, and does not jeopardise these rights in any way. This means you may still have additional rights at law even after the limited warranty has expired. Learn more here.

The Ring app is required for setup. It is compatible with iOS, Android, Mac and Windows 11 devices.

FAQ

What is 2K video quality?

Outdoor Camera features Retinal 2K video quality, which means it captures footage at a resolution of 2560x1440 pixels.

What is the minimum internet speed required for 2K streaming?

A minimum upload speed of 5 Mbps is recommended for optimal performance. Video resolution may vary depending on internet bandwidth.

Will the camera automatically adjust video quality based on internet speed?

Yes, the camera features adaptive bit rate streaming technology that automatically adjusts video quality based on your available bandwidth to maintain a stable connection.

What is Night Vision and how does it work?

Night Vision uses advanced sensors to amplify available light and maintain true-colour video in low-light conditions. So, you'll see true colours of clothing, vehicles, and packages—even at dusk and in dim lighting (like streetlights or porch lights). In complete darkness, the camera switches to sharp black and white for continuous monitoring.

Does Outdoor Camera support 24/7 Recording?

Yes, when plugged in. 24/7 Recording continuously streams and records video to the cloud, ensuring nothing is missed between motion events. Requires a Ring Protect subscription plus the Continuous Recording add-on (£4.99/month per camera). 24/7 Recording cannot be turned on while your Ring Camera is using battery or solar power. If unplugged and on battery or solar power, the 24/7 Recording feature will still record if previously turned on, but it may drain your battery faster.

Is a Ring Protect subscription required for Outdoor Camera?

No. You can still use your doorbell or camera to watch over your home and answer the door from anywhere, even without a subscription to Ring Protect. Without Ring Protect, you'll still receive real-time notifications when anyone comes to your door, and you can answer the notification to see hear, and speak to visitors in real time right from your mobile device. When you access your Ring Dashboard, you'll be able to view the image last captured by active devices.

However, without a subscription to Ring Protect, you won't be able to review any videos or images you missed, and you won't be able to save your videos or photos or share them with anyone. Click here to learn more about Ring Protect and to choose a plan that works for you.
